Mohd Abdul Parvez

Aspiring Data Analyst | SQL | Python | Excel | Data Visualization

Hyderabad, Telangana, India | mohdabdulparvez470@gmail.com | linkedin.com/in/mohdabdulparvez2004 | abdulparvez2004.github.io

Professional Summary

Computer Science Engineering (AI & ML) student with hands-on experience in SQL, Python, Pandas, and Exploratory Data Analysis. Skilled at cleaning real-world datasets, uncovering patterns and data quality issues, and communicating insights that support business decisions. Seeking an entry-level Data Analyst role or internship to apply strong analytical and problem-solving skills in a data-driven environment.

Education

Lords Institute of Engineering & Technology Hyderabad, India

B.E. in Computer Science Engineering (Artificial Intelligence & Machine Learning) Sep 2023 – Sep 2027 (Expected)

Technical Skills

- **Languages & Databases:** SQL, SQL Server, Python
- **Data Analysis:** Pandas, NumPy, Exploratory Data Analysis (EDA), Data Cleaning, Basic Statistics, Faker (synthetic data generation)
- **Tools & Visualization:** Microsoft Excel, Data Visualization, GitHub
- **Core Strengths:** Analytical Thinking, Data Storytelling, Business Insight Generation, Problem Solving

Projects

Healthcare Data Analysis *Python, Pandas, NumPy, EDA*

- Performed exploratory analysis on a large healthcare dataset to identify trends, patterns, and meaningful insights.
- Detected and resolved data quality issues (missing values, duplicates, inconsistencies) to prepare reliable data for analysis.
- Summarized findings with statistical analysis and visualizations to support clear, data-driven conclusions.

Hotel Booking Analysis *Python, Pandas, Data Visualization*

- Analyzed hotel booking data to understand cancellation patterns and their impact on revenue.
- Identified key factors associated with cancellations and highlighted revenue-related risks for business stakeholders.
- Translated analytical findings into actionable recommendations to help reduce cancellations.

MarketSphere Analytics *Python, Faker, Pandas*

- Generated a synthetic customer dataset with Python and Faker to simulate real-world business data.
- Cleaned, validated, and standardized the data using Pandas to build an analysis-ready dataset.
- Practiced end-to-end analytics workflow: data generation, cleaning, exploration, and insight reporting.

SQL Server & AdventureWorks Practice *SQL Server, T-SQL*

- Writing analytical SQL queries (joins, aggregations, filtering, subqueries) on the AdventureWorks database.
- Building hands-on skills in relational data exploration and business-oriented querying.

Additional Information

- Actively seeking entry-level Data Analyst roles, internships, and data projects.
- Continuously strengthening skills in SQL, Python, and statistics through hands-on, real-world dataset practice.
- Portfolio and project code available at abdulparvez2004.github.io.
